

COLBOR BP65 Parabolic Softbox

Useful for portraits or fashion, this BP65 Parabolic Softbox from COLBOR is a 16-sided light-shaper that measures 25.5" (65cm). It offers focused, soft output with a punchy, crisp edge that lends dimension and detail to your subject as well as natural-looking catchlights in their eyes. The unique depth of the modifier renders significant falloff at the field edge and therefore an enhanced degree of directional control, decreased spill light, and easy feathering. The Parabolic Softbox comes with removable outer and inner diffusers that can be used together, one at a time, or not at all to achieve different levels of contrast. COLBOR BP65 has a Bowens mount that fits COLBOR lights such as the CL60, CL60M, CL60R, CL100X and CL100XM. A carry bag is included for storage and transport.

Benefits:

Parabolic Design with 16-sided light-shaper

The parabolic design yields soft, focused light with a crisp edge.

Long Service Life

Durable fabric construction is wind, crush, and fall resistant

Product Parameter

Unfold Dimension: $\phi 65 \times 43$ cm

Packaging Dimension: 68*25*13cm

Weight: 1.5kg

Material: Aluminum Alloy Soft Cloth
